

VAIBHAV DILIP CHAVAN

Frontend Developer | React.js | Next.js | AI-Augmented Development | UI Development

📞 9284512504 | LinkedIn | ✉ chavanvaibhav281@gmail.com

SUMMARY

Frontend Developer with 2+ years of experience building scalable, high-performance web applications using React.js and Next.js. Strong expertise in UI architecture, performance optimization, and REST API integration. Recently expanded into AI-assisted full-stack development, building secure, real-time applications using MERN stack and modern encryption concepts. Skilled at leveraging AI tools to accelerate development, debugging, and system design.

WORK EXPERIENCE

Frontend Developer, MegaConnect Technologies Pvt. Ltd.

Aug 2024 – Nov 2024 | Remote (Karnataka, India)

- Designed and delivered responsive, role-based dashboards and admin panels using React.js and Material UI for subscription and platform management.
- Integrated frontend modules with RESTful backend services, ensuring consistent data flow, state handling, and error management.
- Optimized component architecture and rendering performance, improving cross-browser compatibility and device responsiveness.
- Contributed to UI modernization initiatives, enhancing layout consistency, usability, and user engagement across core workflows.

Software Developer, Creddos

Dec 2022 – Aug 2024 | Nashik, India

- Delivered end-to-end frontend development for multiple production-grade web applications using React.js and Next.js, from requirements to deployment.
- Engineered reusable, component-based UI architectures, improving maintainability and accelerating feature delivery cycles.
- Deployed, monitored, and maintained applications on AWS EC2, supporting stable releases and minimizing production issues.
- Collaborated with cross-functional teams in Agile (Scrum) environments to deliver user-centric solutions aligned with business objectives.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), HTML5, CSS3, React.js, Next.js, Node.js (Basic), Express.js (Basic)

UI & Styling: Material UI, Bootstrap, Responsive Design, Cross-Browser Compatibility

Full Stack & Databases: MongoDB (Basic), REST APIs, MERN Stack (Working Knowledge), Socket.io

Tools & Platforms: GitHub, Jira, Figma, AppSheet, AWS (EC2), Vite

AI & Development: ChatGPT, Google Gemini, Prompt Engineering, AI-Assisted Development

Concepts: Component-Based Architecture, Real-Time Systems, Agile (Scrum), Performance Optimization

EDUCATION

Bachelor of Engineering in Information Technology,

CGPA: 8.02 | 2022 | Nashik

MVP's KBT College of Engineering,

PROJECTS

Limitless Chats — Secure Real-Time Messaging Platform

- Architected a real-time chat application using MERN stack and Socket.io
- Implemented end-to-end encryption concepts using Signal Protocol (X3DH, Double Ratchet)
- Built client-side AES-GCM encryption for secure file sharing
- Designed a Zero-Knowledge backend ensuring server cannot access user data
- Optimized performance using IndexedDB caching and Blob-based rendering
- Integrated real-time message lifecycle tracking (sent, delivered, decrypted)
- Leveraged AI tools (ChatGPT, Google Gemini) for architecture design, debugging, and development acceleration

FitRaptors – E-commerce Platform

- Developed a responsive React.js-based e-commerce platform for fitness accessories, supporting inventory visibility and order workflows.
- Improved checkout experience and UI consistency, contributing to better usability and customer engagement.

Wiko India – Export & Import Platform

- Built React.js dashboards to manage agricultural trade transactions, compliance tracking, and reporting workflows.
- Enhanced operational transparency and data accessibility for export-import stakeholders.

Bharat Bidding – B2B Marketplace

- Developed a Next.js-based industrial bidding platform using Material UI for B2B users.
- Enabled real-time bidding access and streamlined marketplace interactions through intuitive UI design.

MegaConnect Platform

- Revamped core platform UI and implemented a subscription management dashboard using React.js and Material UI.
- Improved design consistency and usability across critical user journeys.
